Subject: anti-trust case

I would like to voice my opinion on the anti-trust case against Microsoft.

I feel this case should be resolved immediately. 30 of the states were not concerned enough to participate in the lawsuit. Eleven of the original 20 states involved were satisfied with the settlement. The remaining states led by the viciously revengeful attorneys general of Miller and Blumenthal are prolonging this case beyond reason. These two individuals have some ax to grind against Microsoft and the court and department of justice should put an end to this.

People like the bundling approach because it makes the life of working on a computer and the internet easier. Technology moves too quickly for any one company to dominate or monopolize.

I hope this lawsuit can be resolved in the next few months and not drag this out any longer.
